CAREER OBJECTIVE

Focused 2026 graduating engineering student seeking an **Analyst Trainee** role to apply problem-solving, basic programming, and data analysis skills while learning enterprise technology delivery.

EDUCATION

Bachelor of Technology (B.Tech) – *Artificial Intelligence and Data Science*

College/University: Jyothi Engineering College, Cheruthuruthy

Year of Graduation: **2026**

CGPA / Percentage: 6.61 ($\geq 60\%$)

TECHNICAL SKILLS

- **Programming:** Python (loops, functions, lists, dictionaries, object-oriented, etc.)
 - **Data Analysis:** NumPy, Pandas (data handling)
 - **Databases:** SQL (queries – SELECT, WHERE, JOIN)
 - **Concepts:** SDLC, software testing basics, debugging fundamentals
 - **Tools:** Git (basic), VS Code
-

ACADEMIC / PRACTICAL PROJECTS

- Collaborated on the development of an Autonomous Healthcare Nurse System, utilizing Python for core logic and problem-solving. Autonomous Combat Drone
 - Collaborated on the development of an Autonomous Healthcare Nurse System, utilizing Python for core logic and problem-solving.
-

STRENGTHS

- Logical thinking & problem-solving
- Willingness to learn and adapt
- Ability to follow processes and documentation standards
